INDUSTRIAL ENGINEERING & STEEL FABRICATION

Our workshop offers the following services:

- *MIG, TIG, ARC & all types of Welding*
- *Fully equipped workshop of 2000 sq m (for all fabrication needs)*
- *Mild steel, stainless steel and aluminium fabrications*
- *Section shearing (up to 16mm)*
- *Cold sawing, drilling, punching*
- *CNC precision, milling & lathe work*
- *Ring rolling angle box tube & RSJ sections*
- *Plate rolling*
- *Hot forging & power hammering*
- *Plate & pressing folding*
- *Plate profiling & laser cutting*
- *Shot blasting*
- *Metal spraying*
- *Powder coating*
- *Liquid spraying*

Specialised Steel Fabrications

Over the years, Walls Engineering have been successfully involved in many unusual and one off fabrications and engineering projects that are well removed from our core business of general steel fabrication.
